TACIROĞLU & PEYSAN

ABOUT US

A leading brand of dairy products and in particular cheese since 1936, we set ourselves the goal of making cheese production an economically viable industry that can contribute to sustainable growth of the economy in 1963 and achieved a breakthrough by introducing packaged cheese to the Turkish consumers.

Combining traditional recipes with modern production methods, our Group has introduced to the consumers the concept of packaged food allowing the TACIROĞLU & PEYSAN brand to be associated with dependability and trust.

In pursuit of the same goals, the Group continued to be a pioneer in the dairy market by introducing the Peysan brand in 1979, a regular manufacturing brand, and by founding the Peysan Food Company. This created a new industry branch and made significant contributions to the national economy.

On top of its traditional cheese range, the company added the Jadel cheese, a quite popular delicacy on the Middle East market, to its product range following trial productions with the assistance of experts brought from abroad in 1987. However, since the market was still flooded by unbranded products back then, other vendors lost no time in imitating the brand-new product branded as "plaited cheese" which was sold by major brands without packaging.

By becoming in 1984 the official distributor of Fromageries Bel, a renowned company hailing from France, the homeland of cheese, Peysan started to import its LA VACHE QUI RIT branded products and sell them in Turkey through its own sales network, making it the first Turkish company to introduce foreign-branded cheese to Turkish consumers. In the following period, it also became the distributor of the French company Besnier Lactalis and sold their PRESIDENT-branded cheese and butter products.

Through its engagement with global brands on the international brand, Peysan drew the attention of the world towards Turkey; continuing to add value to the Turkish economy by creating a new market. The company's exploration of the foreign markets added delicious and high-quality European cheese varieties like Emmantel, Gouda, Edam, Camambert, Brie Madrigal, Roquefort, as well as fresh pasteurized cheese, sliced and triangle cheese to the national palate.

It is the first company that commissioned the production of ULTRA FILTRATED CHEESE, later branded as Peysan Farm", in Denmark and it is also the first Turkish company to have imported UNCLE BEN'S branded rice and introduced it to the domestic market.

Blazing the trail for novelty and innovation in the dairy and cheese sector through the TACIROĞLU & PEYSAN brands and putting its mark on the industry with its forward-looking and visionary approaches, the Group conducts its production activities at its modern, 30,000 square-metered facility and laboratory in Edirne. We purely use Cow's Milk, Sheep's Milk or Goat's Milk depending on the product, with all stages of the production process audited and supervised by experienced engineers and technical staff.

Our facility boasts food safety certificates such as BRC F00F - FSSC as well as a Halal - food certificate and is constantly audited by foreign auditing companies and Turkish auditing organizations such as Tübitak (Scientific and technological research council of turkey) and TSE (Turkish Standards Institute).

Predominantly, all our products bear the PEYSAN & TACIROĞLU brand-name. Our product range includes White Cheese - Goat Cheese and its Varieties - Fresh Kashar Cheese - Aged Kashar Cheese - String Cheese - Jadel (Plaited) Cheese- Tulum Cheese and its Varieties - Round Sheep's Cheese - Cream Cheese - Labneh Cheese - Whey Cheese - Spreadable Cheese - Chechil Cheese - Basket Cheese - Butter - Mozzarella -Cheese Halva - Frozen product varieties.

In addition to the PEYSAN & TACIROĞLU brands, our group has nearly 40 other registered brands such as Sele - Mays - Şef - Kaşkaval - Ekonom - Binboğa - BTH - Siyah İnci - Sarıkız - Kral - Ali Babanın Çiftliği. This reflects the Group's commitment to inspiring trust through dependable brands since 1977. Prepared with traditional recipes and manufactured at the highest quality standards in hygienic facilities, our products are marketed through our sales and marketing networks spread across the country.

Also committed to social responsibility, TACIROĞLU & PEYSAN develops projects with the leading universities of Turkey (Boğaziçi - İstanbul - Bahçeşehir - İtü - Odtü - Bahçeşehir) to allow university students to put what they learn into practice and plan their careers after graduation.

Here is our recipe for the continued success of the PEYSAN & TACIROĞLU brands since 1936;

- We have always loved the work we do, and given it the full respect it deserves.
- We have always attached great importance to the health of our consumers by upholding the strictest standards of hygiene.
- Fully aware of our responsibilities, we have always kept up with the latest in technology and committed ourselves to continued and sustainable transformation.
- We acknowledge the sanctity of human life and respect nature.
- We have always taken all customer feedback and suggestions onboard and acted on them.

With fresh enthusiasm and passion, we continue on our path of making our customers happy by introducing them to new products and flavors and creating new jobs for the youth by making new investments. In the process, we embrace all technological advances and innovations to maintain our relevance in the marketplace.

Our milk originates from the fresh meadows of thrace as certified by the ministry of agriculture.

We changed the playing field by introducing Cheese Wrapped in a Special Package!

TACIROĞLU wrapped up its cheese products in neat packaging 48 years before the prohibition of the sale of unpackaged dairy products by law; being the first company to show concern for public health. Neatly wrapped and packaged, our dairy range is produced at the highest standards to please the palate of our customers.
